THE BAND

TODD DION – Lead Vocals

The term "music is food for the soul" cannot be more accurate for a musician who is highly enthusiastic about making music and performing in most any genre. In fact, Todd started his musical career at an early age, learning the complexities of the music industry while touring with the world-renowned rock group Stryper. After working many years with Stryper, Todd developed a unique and unequalled voice, ultimately earning the right to be called a professional singer. Since this time, he has become accomplished in the art of performing multifarious music for live audiences, delivering engaging singing performances with musical ensembles. This has now brought him to an even higher artistic level, challenging his vocal abilities, paying homage to the musical genius of *Journey*.

FRANK ROSS – Guitars / Vocals

Strumming his first guitar at the age of 14, Frank brings decades of stage experience delivered with a unique blend of melodic and energetic playing and singing. Once leading the first Canadian glamour metal recording act Dagger in the 80's, he then evolved to the United States to perform in various cover and tribute projects and managed a family-owned recording studio in Atlanta. His authentic guitar rendering and perfectly blending vocal harmonies elevate the Journey Captured experience to a whole new level.

Bobby H.Q. Storm – Bass / Vocals

Bassist/Songwriter Bobby H. Q. Storm made his debut during the Hollywood Sunset Strip heyday of the 1980's and early 90's. Throughout the years Bobby H has been involved in numerous music projects which include both original and tribute bands and has shared the stage with the likes of Elton John's original guitarist and music producer Caleb Quaye, Contemporary Christian Music Icon Bryan Duncan, Randy Thomas of Sweet Comfort band and Arthur Lee of Love. Bobby H is an international performer and ASCAP recording artist. Bobby's professional caliber musicianship is evident in all his accomplished endeavors in which styles include Metal, Blues, Rock and Funk. Bobby also strives at keeping the integrity of the original band sound when it comes to tribute projects.

Robert Laviano – Keyboards

Robert grew up outside New York City, and has been playing keyboards since the age of ten. Heavily influenced by bands such as Pink Floyd, ELP and anything from the 80's, Robert spent his early years playing cover songs and writing original music. His tenure in bands like Lost and Found, Black Market Monkey and Alter Ego, prepared him for keyboard playing in Journey Captured. He is also a professional sound designer, and programs custom synth sounds for many live performers and bands internationally.

Michael Thompson – Drums / Vocals

Michael is a drummer/vocalist originally from Hacienda Heights California. He was passionate for music from a young age playing in marching/concert bands. He was honored to have landed work at Warner Brothers in his early 20's and has been fortunate to have performed both live and in studio for various artists such as Brian May (Queen), Caleb Quaye (Elton John), Oz Fox (Stryper) and Van Halen's Sammy Hagar, Michael Anthony and Mark Stone. Through his many experiences, his love for the music of Journey never wavers. "There is something that moves me when I hear and perform Journey tunes. It brings me back to a time when life was easy and fun. Besides, I haven't encountered a single person that doesn't feel the same way. I continue to play to bring smiles to people's faces and Journey definitely does that". As an avid fan of Journey, Michael takes pride in his attention to detail and does his upmost to honor the musical contributions of Steve Smith. He knows his band's relationship and talents are "key" in making that happen. Therefore, he makes sure to acknowledge the fact that they are a team and he wouldn't be anywhere without them.
